

PROVED THAT CAR WAS NOT SPEEDING

Dr. Edwards Had Witnesses, So Charge Against Him Was Dismissed.

UPSET JARRELL'S ESTIMATE

Occupants of Auto Looked at Speedometer When They Saw Officer's Badge.

The statement was printed on Saturday that Dr. C. M. Edwards, together with several other automobile owners, was fined for exceeding the speed limit on Middleburg Turnpike, in Chesterfield County, on Sunday, September 7. This was an error, for while Dr. Edwards was so charged by Officer Jarrell and his associate, "Mike" Cosby, who estimated that his machine was going twenty-five miles an hour, it was shown by competent witnesses that the speed was actually seventeen miles an hour, as registered by Dr. Edwards' speedometer, and Squire L. W. Cheatham was sufficiently convinced to dismiss the case.

Concerning his arrest, Dr. Edwards said yesterday: "It happened that I noted Officer Jarrell's badge as we passed, and mentioned that there were two officers looking for speeders. All in my car remembered the remark, and some of the number, as a matter of interest, glanced at the speedometer to see how fast we were going—a thing that was fortunate, since this made them definite witnesses for me.

"But for the fortunate coincidence I would very likely have suffered the same penalty as a friend who was out that evening for a drive with his wife, and who said he was unconscious of having exceeded the speed limit of twenty miles, but who was convicted on the estimate of the same officers. He was not in position to disprove their estimate.

"For information, and as a matter of general interest, I would thank you to state in the columns of your paper what disposition is made of fines of those convicted of speeding on the highways of Chesterfield County."

ADDITIONS TO FACULTY.

Made Necessary by Increase in Number of Students at A. & M.

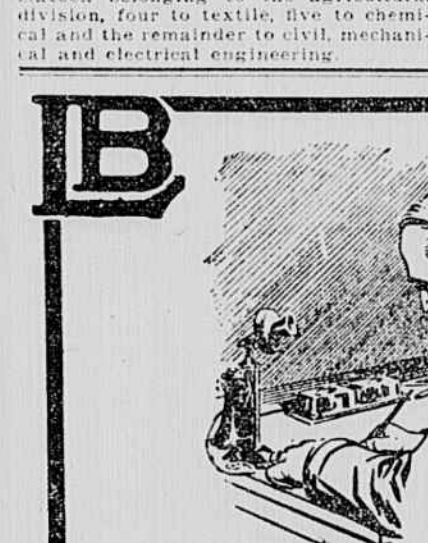

[Special to The Times-Dispatch.] West Raleigh, N. C., September 15.—The increase in the number of students at A. & M. this year has necessitated the addition of two instructors in the mathematics department and one in the English department.

P. S. Hales, of Wilson, N. C., and E. A. Rickard, of China Grove, N. C., have taken charge of the new classes in mathematics, and A. J. Farrell is teaching the new section in English.

A noticeable feature of the registration this year is that a larger number of graduates from rural high schools than ever before have entered the college. These schools are also preparing their students more thoroughly for college work.

The Roper Lumber Company, of Norfolk, has given two agricultural scholarships for farm boys. These will make six scholarships that have recently been given the college.

The senior class this year is the largest in the history of the college. There are seventy-five students registered in the senior class, twenty-five of whom are agricultural, two textile, two chemical and the remainder belonging to the different mechanical divisions. Last year there were fifty-six seniors, sixteen belonging to the agricultural division, four to textile, five to chemical and the remainder to civil, mechanical and electrical engineering.

The President writes.

Of the "Automatic Index" method of filing, the president of a large confectionery concern writes: "It has overcome all of our filing troubles. Filing is no longer a trouble, but rather a pleasure."

A big real-estate man says: "We cannot say too much in its favor."

A firm of stock brokers writes: "We gladly recommend it."

Hardware manufacturers: "Has done all you claimed for it."

The "Automatic Index" prevents errors in filing, because it checks itself. It saves space. It saves money because it is so easy to operate. Offices which have adopted the "Automatic Index" have got rid, for all time, of the "I-can't-find-that-letter" nuisance.

Is used for all kinds of filing—letters, invoices, credit information, card indexes, card ledgers.

Let us show you the "Automatic Index" in actual operation. It is an absolutely new principle in filing.

POST-OFFICE HAS GROWN HOME

Almost Before Building Is Completed, Parcel Post Makes More Room Vital.

TERMINAL STATION ADDED

Packages for Virginia to Be Distributed From Basement—Need Christmas Room.

Even before the paint had been applied to the interior walls, the post-office is outgrowing its quarters. The magnificent new \$300,000 structure, designed to care for the growth of a decade's postal business, was conceived at a time when the parcel post was but a theory, and no account of this new class of mail matter was taken in its creation. If there were no parcel post, the new post-office would still be capable of caring for the needs of the city for years. The parcel post, flood-like the mails with a bulky, weighty class of matter, has demanded large quarters.

Postmaster Allan has begun to look around for a vacant building in the neighborhood of the post-office which can be used when the Christmas rush comes on. In designing this new provision for handling the Christmas rush was made in the shape of a large room in the basement. This room has just been demanded by Postmaster-General Burleson for housing the parcel post terminal station. According to the new scheme for expediting the parcel post service, fifty cities in the country have been designated as terminal stations, and will receive for distribution parcels for one or two States.

New Service System. This terminal station is more properly a branch of the railway mail service, and will not add to Postmaster Allan's quarters. Superintendent Elam, of the railway mail service, will be in charge. He has designated seven experienced clerks, all acquainted with the railway mail service system, to handle the mass of unsorted fourth-class matter that will pour into the Richmond post-office over the State.

It is estimated that parcel post matter will come into this terminal station daily by the railroad, adding enormously to the volume of business handled by the Richmond post-office. If a man in Chicago mails a parcel post package to a person in Fredericksburg it will be placed in a mail pouch marked "Richmond and District," and forwarded immediately here in the terminal station. It will be placed in the Fredericksburg mail without delay. The new system of relay stations is expected to be an aid to efficient service.

FEAR COMPLICATIONS

Believed That Young Conductor Who Shot Will Develop Pneumonia.

While the condition of Warren W. Hoot, the nineteen-year-old street car conductor who shot his way above the heart Sunday afternoon following a quarrel with his wife, was last night reported to be satisfactory, physicians at the City Hospital, where he is a patient, expressed fears that secondary pneumonia would develop. Hoot has been a victim of heart trouble for some time, and this has added to the gravity of his condition.

The wounded man, however, has been holding his own, it was said, and, unless unforeseen complications set in, he has a good chance of recovery.

Negro Had Revolver.

Harry Allen, colored, was fined \$100 and costs and placed under \$100 bond for twelve months yesterday morning in Police Court for carrying a concealed weapon, a revolver.

Grocery Store Robbed.

James Walpert yesterday reported to the police that his grocery store was entered and \$1, a small quantity of groceries and cigarettes stolen.

Marriage Licenses.

Licenses to marry were issued yesterday by the clerk of the Hustings Court to Ben E. Reed and Kate Fay Smith and Jane Edward Clarkson and Vera Hundley Gentry.

STEINWAY

V. P. L. WILL OPEN ON SEPTEMBER 24

Indications Are That Attendance Will Exceed That of Last Year.

[Special to The Times-Dispatch.] Blacksburg, Va., September 15.—Indications are now that the attendance at the opening day of college, Wednesday, September 24, will exceed that of last year. One hundred and seventy men, to date, have fulfilled the entrance requirements and notified the registrar that they will enter the V. P. L. session. Many others have made application, who will come here to stand the entrance examinations, or with the necessary certificate from preparatory schools for entrance to the college without examination. It is not possible to forecast with any degree of accuracy the number of old students who will return, as those with good records in military and academic work are not required to comply with any formalities before they appear for matriculation.

The first term of the session 1913-14 will begin with chapel exercises the morning of September 24, and the remainder of the week is given up to the usual routine of the college. The regular class work will begin as soon as possible afterwards.

R. W. Owens, the new secretary of the college, arrived this week, and has entered upon his duties. Mr. Owens is a native of Indiana, and is from Maryville College, Tenn., where he was closely identified with association work and the leading athletic team.

Orrin R. Magill, secretary of the local association for the past three years, will sail October 1 for China, where he goes as a missionary teacher of the Presbyterian Church. During his tenure of office here, Mr. Magill did a splendid work for the association, being largely instrumental in raising over \$200 toward the signing of a mortgage on the building, and providing a leading factor in the religious life of the school.

Dr. Howard S. Reed, professor of mycology and bacteriology, and Mrs. Reed, arrived at the college Wednesday from a trip to Europe, where Dr. Reed spent the past ten months in special study at the leading agricultural universities of the continent. He has been on leave of absence granted him by the board of visitors for that purpose.

Some very interesting facts about V. P. L. graduates are set forth on a folder recently issued by the Blacksburg Board of Trade. Among those who are holding high positions in the industrial and professional world, and who obtained their education at the college, are the managers of the largest gold mines in South Africa, the acting director of the experimental station in the Argentine republic, the engineer who broke the lock gates at Panama and others.

Dr. E. B. Reed leaves Tuesday to take up his duties as associate professor of bacteriology at the Wisconsin Tech. and Univ. B. H. Hughes will start the same day for the University of Minnesota to enter upon his work as associate professor of agronomy. Both are graduates of the V. P. L., and have worked hard here since their graduation, and are now leaving to take positions that are distinct promotions, and that came to them entirely unlooked for.

President Eggleston is arranging for the usual farmers' short course, special course in dairying and other classes and courses for the benefit of the Virginia farmers and agriculturists this winter. These will be conducted on a larger and more advanced scale than ever before.

The Blacksburg High School opened for the session this morning, with the following teachers: Miss Emma S. Yerby, of Norfolk, principal; Misses Anna M. Campbell, assistant in high school work; Oro M. Brown, eighth grade; Elizabeth Evans, of Statesville, N. C., sixth grade; Mary Stranger, fifth grade; Amenta Mathews, fourth grade; Mary Wall, third grade; Laura B. Miller, second grade; Elizabeth Woolwine, primary department. The manual training branches are under the supervision of Misses Mathews and Wall, graduates of the Farmers' Normal, and Mrs. Milton Cuthrell, a graduate of the Blackstone Female Institute, has charge of the department of music.

On account of the crowded condition of the main school building, it has been necessary to secure quarters for the second, third and fifth grades in another building, three rooms in the Black Convent, which has been been rented. Some work to be assigned, will be done for the higher grades by young men from the senior class of the V. P. L. The school committee from the Board of Trade will continue its efforts to raise funds, by bond issue or private subscription, to erect a school building that will accommodate the pupils entitled to attend the town school. The enrollment reached 350 last session, and it was necessary to have some of the pupils come for only a part of the day.

Sell Broad Street Store. A deed filed yesterday in the Chancery Court records the sale of the lot and building known as 8 East Broad Street for \$250. The sale is made by T. Garnett Tabb and wife to Hugh Denoon.

Hearing on Stable Permit. The Ordinance of the City Council will be at its meeting on Thursday night pass upon the application of the Manchester Mill and Lumber Co. for a stable on the east side of Fourth Street between Hull and Decatur Streets, South Richmond.

Y. M. C. A. Moonlight Canceled. The Y. M. C. A. moonlight excursion advertised for to-night has been called off on account of the very cool weather. The association will not attempt to run another excursion this season.

NEW DINING HALL OF MODERN DESIGN

Will Be Erected at Cost of \$50,000 at University of North Carolina.

[Special to The Times-Dispatch.] Chapel Hill, N. C., September 15.—Modeled on plans of the dining-halls of Harvard and other Northern universities, the University of North Carolina will soon begin the construction of its \$50,000 dining-hall determined on by the trustees of the institution a year ago. The contract for the construction of the building has been let, and W. B. Barrow, of Raleigh, is the contractor engaged. The contract calls for a completion of the building by May 20, 1914.

The site upon which the building will go up is opposite the present Commons Hall and diagonally across from the new Penobscot educational building, where the residence of Prof. A. H. Patterson now stands. The residence is, perhaps, better known as the old Gore place, for many years where the late Prof. J. W. Gore lived. It is one of the old landmarks of Chapel Hill, dating its existence back into old days of the "Hill," when only a few fences were hedged about in the forests.

The dedication of the new dining hall will be celebrated simultaneously with the annual alumni banquet at the University of North Carolina, the banquet being held in the new hall.

The building committee is composed of the following alumni and faculty: Secretary of the Navy Josephus Daniels, chairman; Julian S. Carr, of Durham; A. M. Seales, of Greensboro; F. P. Venable, A. H. Patterson, L. R. Wilson and W. D. Toy, of Chapel Hill.

Class in Journalism. The class of journalism at the university begins the present session with a membership of twenty. From a small class of five or six students three years ago, as signified by the phenomenal growth in students, the journalistic course has become a permanent factor in the curriculum of the institution. The class is under the instruction of Dr. James P. Royce, who has seen service on the largest daily in Chicago.

Dr. C. H. Herty, professor of chemistry in the university, returned today from Rochester, N. Y., where he has been attending the sessions of the American Chemical Society, convening in that city from September 8 to 12.

Dr. Herty, whose activities in research work in turpentine conservation is as widely known as his experiments in chemistry, was one of the four speakers to address that gathering of chemists from many parts of the world.

"The Effects of Resene on Soap Solutions," and "Isoprene from Commercial Turpentine" were the two themes which the University of North Carolina professor presented to the 100 or more scientists that gathered in Rochester. Dr. Herty holds the distinction of being one of the eight national councilors of the American Chemical Society.

It has been officially announced by Acting President E. K. Graham that Secretary of the Navy Josephus Daniels will be the principal speaker at the laying of the corner-stone of the institution 119 years ago.

WOODMAN'S COLLEGE WILL BEGIN LAST

All Local Institutions at Work Before Big Girls' School Opens New Session.

The Woman's College will be the last of the local educational institutions to take up the new year's work. The session, 1913-14, will begin September 25. It is announced, and from the numerous inquiries it is believed that the enrollment will be particularly heavy.

Last year there were 180 pupils in the college and twenty-eight pupils in the preparatory department, and it is anticipated that the number this session will be greatly increased. The work of the college is divided into six departments—preparatory, subcollegiate, collegiate, music, expression and physical culture and art. The course of study leads to degrees of bachelor of arts, bachelor of science, bachelor of letters, bachelor of music and post-graduate bachelor of music.

The officers of the school are: James Nelson, M. A., D. D., LL. D., president; Melvin A. Martin, A. M., dean; Mary Carter Anderson, M. A., principal, and A. Ruggles Nelson, business manager. The faculty is as follows:

Dr. Nelson, lectures on biblical literature; Miss Anderson, principal, and pedagogy; Frank C. Woodward, A. M., LL. D., English and English literature; L. P. Stouffer, B. S., mathematics; Linda Lee Clift, B. A., Latin and history; Mattie C. Denny, French and German; Helen E. Baker, A. M., Latin and history.

Department of music—A. F. Unkel, Stuttgart Conservatory, Germany, piano; Jacob Reinhardt, D. Mus., piano and pipe organ; Mary S. Taylor, B. Mus., piano; Mrs. M. V. Armistead, B. M., piano, harmony and history of music; Mrs. Melvin A. Martin, voice; Lamont Galbraith, licentiate of Royal Academy of Music, London, voice; Annie Louise Reinhardt, violin.

Department of expression—Frances A. Beauchamp, B. L.

Department of art—Emma Morehead Whitfield, B. A.

Preparatory department—Cora C. Lawson, B. A., principal; Jessie Ham, B. A., assistant.

Domestic department—Mrs. James Nelson, Mrs. Mittle Grove and Mrs. E. A. Blanford, matrons.

Physician—William F. Mathews, M. D.

Arrested for Stealing Cows. John Bohannon and Herbert Cox, two Southside Riches, were arrested yesterday morning in Main Street by Officer Sweet, on the charge of stealing a cow from John T. Maul. When arrested before the case was heard in Police Court, young Bohannon was sent on to await action by the grand jury. Cox was dismissed on the same charge. According to Maul, the cow was stolen early yesterday morning from his stable, and carried to the Old Market for sale, where the owner found her.

Working on Forest Hill Delivery. While some time will probably elapse before it is inaugurated, residents of Forest Hill are assured by the postal authorities that everything is being done to secure a mail delivery service for that suburb as soon as possible. Superintendent Lloyd yesterday received a communication from Washington, stating that the matter had been referred to the inspectors of mail delivery extension. This is thought to be the last department through which it has to pass, before it is put into effect.

Civil Case Dismissed. After being continued several times, the case of I. H. Boshier against Reinach & Company and W. B. West, in a suit for damages, was dismissed yesterday in Hustings Court, Part II.

Animals Objects of Assault. Fountain Woodson, a colored preacher, was arrested by Officer Fred Breeden yesterday afternoon on the charge of shooting and wounding the horse of William E. Thompson. Thompson said the gun exploded accidentally. He was bailed for his appearance in Police Court, Part II, to-day. William Coleman, also colored, was arrested by Officer Breeden for cruelty to a mare belonging to I. J. Smith Company, by whom he was employed. It is charged that the driver used a stick as large as a baseball bat on the animal's body.

Says He Skipped Board Bill. Thomas Hett, colored, was arrested yesterday morning by Officers Phillips and Dunnavant on the charge of attempting to defraud Mary Binford out of a board bill amounting to \$27.91. He was locked up pending a hearing before Justice Maurice this morning.

Painting Postal Station. The odor of fresh paint permeated the Manchester postal station yesterday, and danger signals adorned the posts. Contractor T. L. Nicholas is painting the outside ironwork of the building a deep black color. This contrasts strongly with the white trim and walls, giving to the station a very striking appearance. The work is expected to be completed this week.

Summoned for Speeding. Miss Moore, daughter of W. C. Moore, a member of the Henrico Board of Supervisors, has been summoned by Squire Cheatham to answer to the charge of running her automobile faster than the law allows. She will be given a private hearing next Saturday.

To Study Grand Opera. W. Hubert Betts, of 1430 Perry Street, who formerly sang in the choir of Grace Episcopal Church, has left for New York City, where he will take a course in grand opera. Mr. Betts has gained considerable prominence in Richmond as a singer, and is well known in the churches. He will spend several months in the study of vocal art.

Personal Mention. O. D. Brinser, of 1309 Decatur Street.

Novel Displays for Fashion Week. Show Will Exhibit Assortments of Goods From All Over the World.

Assortments of goods from all over the world are to be on exhibition in Fashion Show, which is to be held here September 25-26, inclusive. The displays will excel every previous record in variety, beauty, usefulness and extensiveness. Everything useful and fashionable in all lines will be shown, and it will be an educational treat in styles and practical economy to take a trip through the various stores during Fashion Week. Special fashion events and merchandise features are planned for every day.

The chief idea of the Fashion Show, it is explained by those who have planned and are directing it, is not to sell goods, but to show merchandise and merchandise such as one will want now or will want soon—and can and will buy. And the idea is also to establish in the minds of the people in the shopping territory of which Richmond is the centre the fact that Richmond can supply every want, and supply the newest, smartest, best in style, quality and value in every line of merchandise.

The window decorations promise to surpass any ever before undertaken in the city. But the best of the Fashion Show will be behind the windows inside the stores. The windows will give but a hint of what the stores contain.

The windows will be unveiled and lighted at 8 o'clock Monday night, September 22, revealing to the throngs on the streets the newest ideas in merchandise for the fall and winter seasons. Tuesday morning the stores will be thrown open for business and inspection of the interiors. The show, which will last until Friday, is to be held under the auspices of the Retail Merchants' Association, and is being directed by a committee consisting of Isaac Cohen, chairman; L. H. Kaufmann, Samuel Sutherland, H. Carl Boschen, Raphael Levy, W. H. Schwartz, J. J. C. Child, and W. A. Clarke, Jr., secretary of the association. Membership cards in the windows and stores will designate the members of the association who are taking part in the Fashion Show.

Some one has said that water should be used Externally, Internally and Eternally. For the Eternal Internal use we recommend

Broad Rock Water

BECAUSE IT IS
Wonderfully Pure

NEWS OF SOUTH RICHMOND

NUNNALLY IS INDICTED

Grand Jury Does Not Find True Bill Against Schiele. Here a verdict was returned against Elvin P. Nunnally, alias "Jim" Nunnally, by a special grand jury yesterday in Hustings Court, Part II. A similar charge against Taylor N. Satchfield was not proved, and he was dismissed. It was shown that Satchfield did not participate in the second attack on the office, which, in the jury's opinion, constituted the felony.

True bills were found and indictments were returned against the following: Scott McGee, charged with housebreaking, two counts; Harry Filliaux, charged with striking T. J. Maxey with an iron wrench; John Pryor, charged with feloniously stealing Sidney Tinsley, a Southside grocer. The case of John Brooks, which was continued from the last term of court, was set for a hearing to-morrow. Charges against C. N. Hightower, for feloniously assaulting James Perry, were not proved. He was, however, sent back to Police Court, Part II, for trial on a misdemeanor charge.

No civil cases and only a part of the criminal cases were presented to the grand jury yesterday. Another session will be held to-day, and the rest of the docket disposed of.

Arrested for Stealing Cows. John Bohannon and Herbert Cox, two Southside Riches, were arrested yesterday morning in Main Street by Officer Sweet, on the charge of stealing a cow from John T. Maul. When arrested before the case was heard in Police Court, young Bohannon was sent on to await action by the grand jury. Cox was dismissed on the same charge.
